Salah Eddine HAMMOUYAT
Agronomist Engineer

Profil

I'm a hands-on agronomist engineer eager to blend crop science with smart technology—like satellite imagery and AI—to grow agriculture forward. When I'm not learning about precision farming, I'm building my skills in finance, marketing, and coding online and offline. I'm looking for a place where curiosity meets crops, and where I can help build the future of farming.

Education

Sept. 2017 - Sept. 2022	State Engineer in Agronomy National School of Agriculture of Meknes Meknes Major: Crop Production Science and Techniques
Apr. 2022 - Sept. 2022	Erasmus Exchange Program - Final Year Project in Precision Agriculture University of Szeged Hungary Development of a predictive yield model for soft wheat based on drone imagery
Sept. 2016 - Sept. 2017	Baccalaureate in Physical Sciences Driss BenZekri High School Tiflet Highest Honors

Work experience

Since Feb. 2024	Technical Sales Representative SONACOS Sidi Kacem Main Responsibilities: <ul style="list-style-type: none">Managed seed and agricultural input programs within the assigned territory.Identified local needs and adapted product offerings.Implemented regional action plans (production, logistics, promotion) with management.Promoted products to agricultural stakeholders (multipliers, distributors, clients). Key Activities and Achievements: <ul style="list-style-type: none">Managed seed production: selected and monitored multipliers, oversaw pre-certification, industrialization, and packaging.Ensured quality control: conducted sampling, treated seeds, managed inventory, and coordinated transfers.Led commercial development: conducted market research, expanded client base, executed promotions, and managed distribution.Monitored KPIs: tracked sales, inventory, and collections with regular reporting.Supported innovation: implemented demonstration trials and provided technical training to multipliers and partners.
Jan. 2023 - Jan. 2024	Socio-Economic Surveyor JICA (Japan International Cooperation Agency) Kenitra, Morocco <ul style="list-style-type: none">Designed and finalized the survey questionnaire.Identified and selected target farmers for the project.Conducted 500 farmer interviews across 15 communes.Collected and verified socio-economic data.Contributed to the final survey report.

Skills

- Production & Logistics Management (SAP ERP)
- Precision Agriculture (Satellite Imagery/GEE)
- Sales Strategy & Market Development
- Seed Quality Control & Phytosanitary Inspection (ONSSA Controller)
- Data Analysis & Reporting
- Technical Support & Agricultural Consulting
- Contract & Partnership Negotiation
- Adaptability & Problem Solving

Computer Skills

- Integrated Management Software (SAP - Key Modules)
- Data Analysis (Excel, SPSS)
- Programming (HTML, CSS, PHP, JavaScript)
- Mapping Software (QGIS, ArcGIS)
- Google Earth Engine (GEE) - a geospatial platform for analyzing and visualizing large-scale terrestrial data
